

product brief

The NEXT generation optimizer of rumen activity Developed by ruminant specialists for ruminant specialists

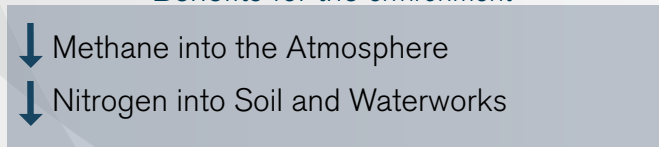

Over 5 years of continuing research has led to the selection of the two most potent active ingredients from natural plants: Cinnamaldehyde (naturally found in Cinnamomum spp.) and diallyl disulfide (naturally found in garlic oil from Allium sativa).

Benefits for the animals

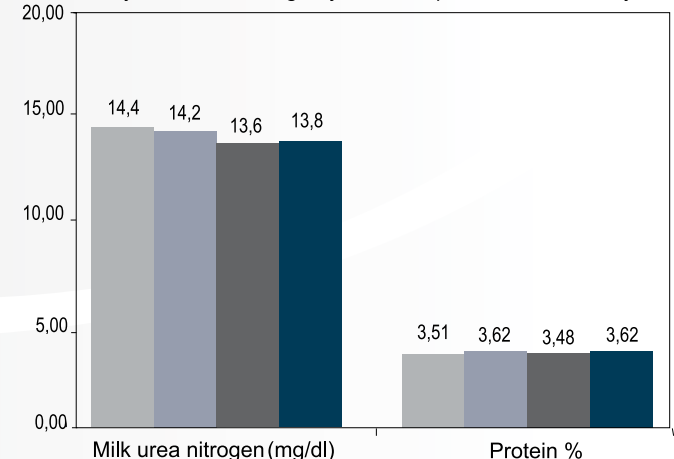

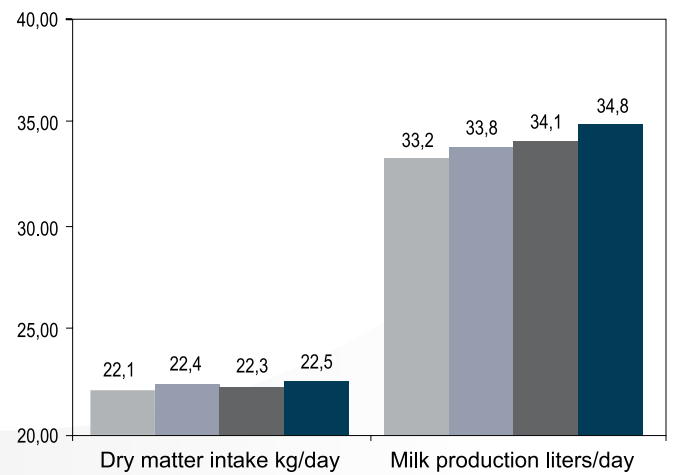

Benefits for the environment

Key Benefits

- NEXT Enhance 300 has a unique protection system
- NEXT Enhance 300 releases active ingredients where the animal needs them
- NEXT Enhance 300 has a well-documented mode of action reducing rumen ammonia and methane
- NEXT Enhance 300 improves milk production and milk component yield
- NEXT Enhance 300 is proven in both forage and concentrate diets alone or together with live yeasts

Control diet
Control diet with live yeasts
Control diet with NEXT Enhance 300
Control diet with live yeasts and NEXT Enhance 300
