

# Project Newton in Calhoun County

The right project, in the right place, being proposed by the right people.

## Economic Impact & Benefits

Novus International, Inc., a global leader in developing animal health and nutrition solutions, has selected Calhoun County, Texas as the location for a planned new \$360 million manufacturing facility in Green Lake. The facility will expand the company's production of ALIMET®, a feed supplement for livestock, poultry and aquaculture diets. Pending permit approvals, construction is expected to begin in early 2019 and be completed by the end of 2020.

### During the 18-month construction phase, activities are projected to:

generate  
**\$530M**  
in economic output

support  
**800+** jobs

generate  
~ **\$140M** in payroll

result in  
~ **\$300,000** in  
city & county sales taxes

### During the first 20 years of operations, activities are projected to boost the area economy by:

generating  
**\$19.3B+**  
in economic output

generating  
**200**  
local jobs

creating  
~ **\$9M** in new  
residential property

adding  
**\$370M+**  
in taxable property

Cities & Counties  
will see a net benefit of  
**\$19M+**

Calhoun County Groundwater  
Conservation District  
will see a net benefit of  
~ **\$650K**

Calhoun County ISD  
will see a net benefit of  
**\$50M+**

**In total, Calhoun County will experience benefits in excess of \$71M during the first 20 years of operations.**
